

Scroller Image Gallery

Content:

Description	2
Add a New Gallery	3
Add Images	5
Place a Gallery	8

Description

The Slider Gallery is a sleek way to organize a group of photos. The user can scroll through the photos using the next and previous arrows. The gallery can contain an unlimited number of images that can be changed at any time and linked to other pages on or off the site.

Finding the Module

The left side of the main administrative page is divided into various sections. Each section deals with a specific functionality of the Ultra IS application like Content, Secure Users, Help, Webmaster, Advanced Features, etc. Scroller Image Gallery is part of the Advanced Features of the ProFusion Ultra IS application.

Add a New Gallery

To begin using your scroller gallery, you must first create a gallery. To add a new gallery:

1. **Click** on Scroller Image Gallery link under Advanced Features section heading from the main admin page screen as shown above.
2. This action takes you to the Gallery main page screen which looks something like the figure shown below. In this screen you can add, edit, or delete gallery/images.

Figure 1.1

List Galleries		Add New Gallery	
[Add New Gallery]			
SHOWING 1 - 1 of 1		< First Previous Page 1 of 1 Next Last >	
<input type="checkbox"/>	GALLERY NAME	ADD/EDIT IMAGES	
<input checked="" type="checkbox"/>	Test	<input type="button" value="Add Images"/>	
Activate Gallery(ies)		<input type="button" value="Go"/>	
Legend			
<input checked="" type="checkbox"/>	Add Images to Gallery		
<input checked="" type="checkbox"/>	Activated Gallery		
<input type="checkbox"/>	De-activated Gallery		

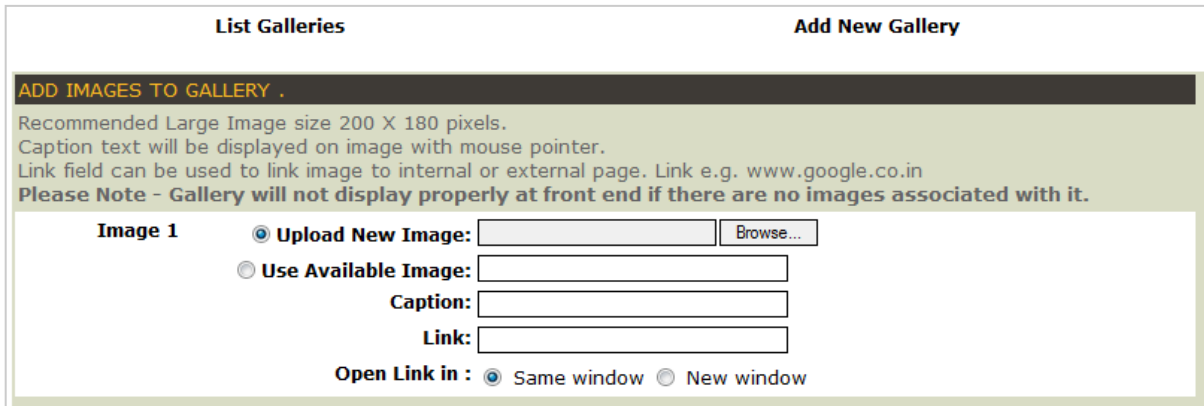

3. **Click** either the [Add New Gallery] link that you see above the Gallery Name heading or the Add New Gallery link placed on top of the screen.

List Galleries		Add New Gallery	
(Fields marked * is mandatory)			
ADD GALLERY			
Image Gallery Name*	<input type="text"/>		
Image Gallery Images Width*	200	<input type="text"/>	px
Image Gallery Images Height*	180	<input type="text"/>	px
Description	<input type="text"/>		
Rotation	<input checked="" type="radio"/> Show Images sequentially <input type="radio"/> Show Images randomly		
		<input type="button" value="Save"/>	<input type="button" value="Cancel"/>

4. You will be presented with a new Add Gallery screen like shown in the figure below.
5. **Image Gallery Name** – **Type** in the name of the gallery that you want to create in this box. This name will not be displayed on your website. It is provided to help you identify various galleries that you might have on your website and for easy reference. For this tutorial, we shall name the gallery as “Gallery1.”
6. **Image Gallery Images Width** – This allows you to set the width of the images in a gallery. **Type** the width of the images (in pixels) that you want to display in your gallery. In this case, we will set the image width at 200 pixels.
7. **Image Gallery Images Height** – This allows you to set the height of the images in a gallery. **Type** the height of the images (in pixels) that you want to display in your gallery. We will set the image height at 180 pixels for this tutorial.
8. **Description** – This is an optional field. If you would like to have some description for the gallery, **Type** in the details in this box and it will display on the website above the main image.
9. **Rotation** – This option allows you to choose between having the images scroll in sequential order or to have them scroll in a randomized order. If random is selected, the order of the images will change when the page is refreshed.
10. **Save** **Click** to save your gallery. You will now be presented with a new Add/Edit Images screen (see figure below) prompting you to add images to the gallery that you have just created.

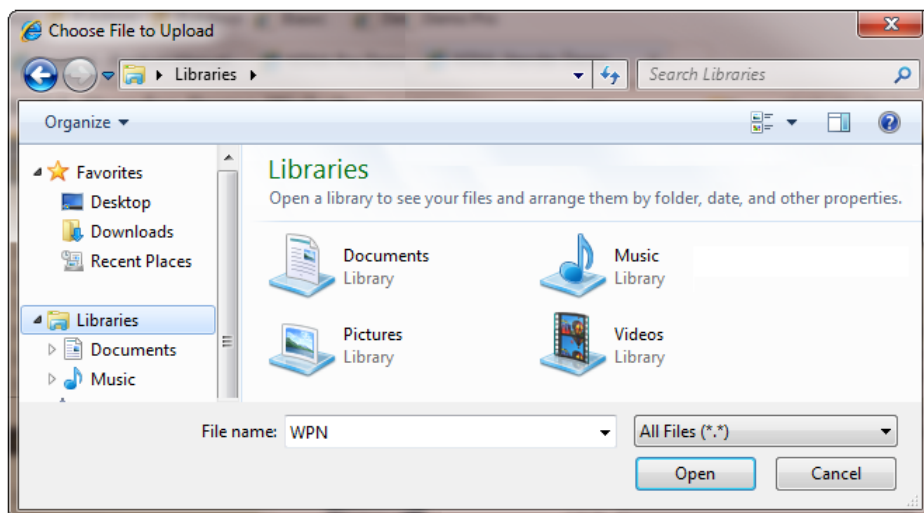

Add Images

1. **Upload New Image** – When you create a gallery for the first time, you will be using this option to upload an image. **Select** this radio button and **Click** **Browse...**.

The screenshot shows a web form titled "Add New Gallery" with a sub-header "ADD IMAGES TO GALLERY". Below the header, there is instructional text: "Recommended Large Image size 200 X 180 pixels. Caption text will be displayed on image with mouse pointer. Link field can be used to link image to internal or external page. Link e.g. www.google.co.in Please Note - Gallery will not display properly at front end if there are no images associated with it." The form contains a section for "Image 1" with two radio buttons: "Upload New Image:" (selected) and "Use Available Image:". Below these are input fields for "Caption:" and "Link:". At the bottom, there is a section for "Open Link in:" with two radio buttons: "Same window" (selected) and "New window".

2. This action opens a Choose File pop-up window (see figure below) prompting you to search all folders in your hard drive and choose the image you want to upload into the gallery. **Select** the image and **Click** **Open** or simply **Double-Click** the image to upload the image.

3. **Use Available Image** – If you want to display an already uploaded image, you will use this option. **Select** this radio button and **Paste** the "Path" link of the image you would like to use. The path for the image can be found at the bottom of the image in the gallery as shown in this figure below.

Note: Upload all the images into the gallery by repeating either step 2 or 3.

Image 1

Upload New Image: Browse... View Delete

Use Available Image:

Caption:

Link:

Open Link in : Same window New window

Path: [http://www.profusiondemos.com/Assets/ScrollerGalleryImages/Page_Links/19889880\(1\).png](http://www.profusiondemos.com/Assets/ScrollerGalleryImages/Page_Links/19889880(1).png)

4. **Caption** — If you type a caption for an image, it will be displayed on the website on mouse over of the image and below the main image, see [figure 1.4](#). Let us type in a caption “Bay Windows” for the image.

Figure 1.2

Image 2

Upload New Image: Browse... View Delete

Use Available Image:

Caption:

Open Link in : Same window New window

Path: [http://www.profusiondemos.com/Assets/ScrollerGalleryImages/Page_Links/clipping\(2\).png](http://www.profusiondemos.com/Assets/ScrollerGalleryImages/Page_Links/clipping(2).png)

5. **Link** – This is a provisional field through which you may hyperlink the images in a gallery to either an internal (within the same website) or an external (any other website) web page. **Type** in the path of the website that you wish to link to the image.

Note: For example, if you were to type www.google.com then **Clicking** on the image will open the Google page in the browser.

6. **Open Link in** – Should you wish to link the image to a web page, you may do so by choosing to open the page in a new browser window or same browser window by **Selecting** Same window New window as appropriate. See [figure 1.2](#).

7. Once you are complete with the upload of the images, **Click** **Save** at the bottom of the page to save the uploaded images. In this tutorial, now we have created a gallery named “Gallery1” with images in it.

Note: You may create as many galleries as you want in your website. Simply follow the above steps to create galleries and upload images. Once the galleries are created, the Gallery main screen page should look like the figure below. All your galleries would now be listed here. From here, you can edit the gallery and/or the images.

To edit the properties of a gallery, **Click** on the gallery name. To add/edit images in a gallery, simply  **Click** arrow of the corresponding gallery. To activate, deactivate, or delete  a gallery, **Click** arrow and **Select** as appropriate from the drop down menu. An activated gallery would have a  sign next to it whereas a deactivated gallery would have a  sign next to it and its images would not display

List Galleries		Add New Gallery

on the frontend.

Place a Gallery

1. **Click** Inner Pages link on the left hand section of the main administrative page

Free Space	Used Space
1020 MB	30 MB
File System : 975.06 MB	File System : 24.94 MB
Database : 44.94 MB	Database : 5.06 MB

screen.

2. This action takes you to the Main Pages screen where all your web pages will be listed as shown below. **Click** the page on which you want to display your gallery. In this case, we will **Select** "About Us" page. This takes you to the About Us page edit screen. See [figure 1.3](#) below.

	<input type="checkbox"/>	SECTION TITLE	ORDER	SECONDARY PAGES
✓	<input type="checkbox"/>	Services	↑ ↓	→ [0]
✓	<input type="checkbox"/>	Products	↑ ↓	→ [0]
✓	<input type="checkbox"/>	About Us	↑ ↓	→ [0]
✓	<input type="checkbox"/>	Contact Us	↑ ↓	→ [0]

Activate Page(s)

Legend
✓ Active Pages

- If you would like to have some page content along with the gallery on your web page, **Type** in the content using the page editor.
- Position** the cursor inside the text area where you would like the gallery displayed and **Select** the gallery that you want to use from the Elegant Image Galleries drop down menu as shown in [figure 1.3](#) below. This action places the gallery on your web page. In this case, we will **Select** “Gallery1” from the menu.

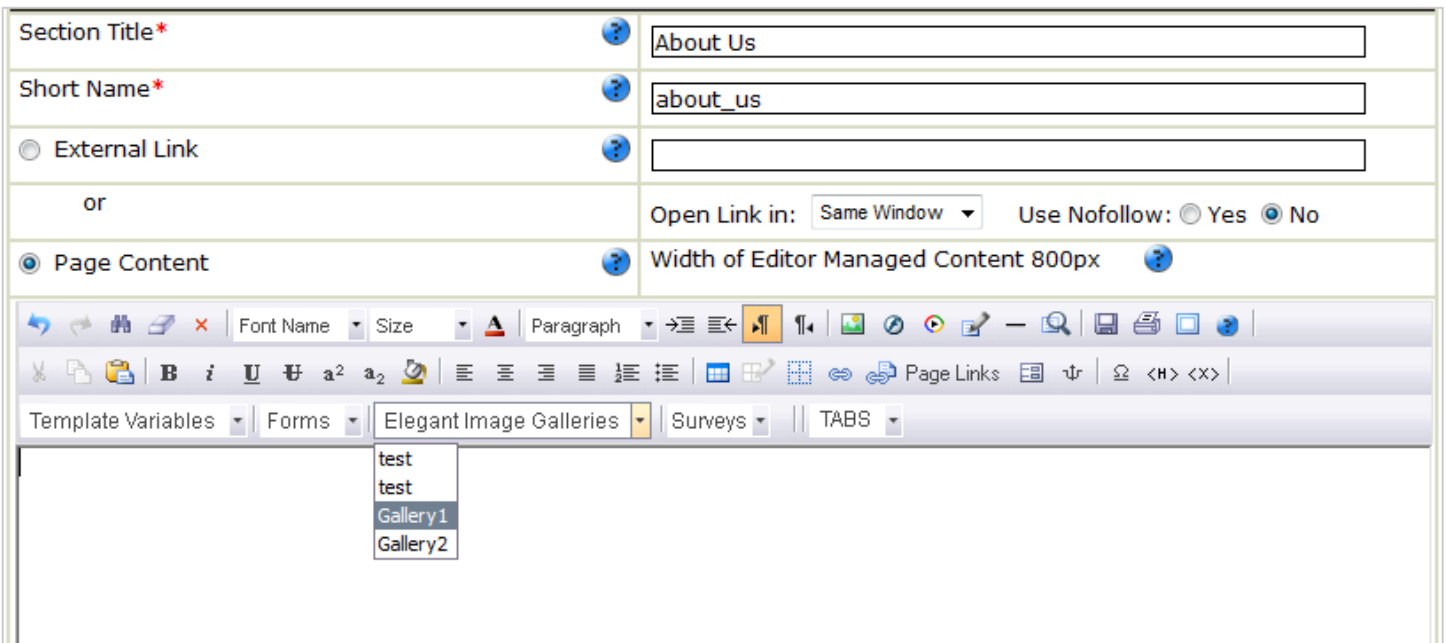

Figure 1.3

- Now you will see something like [TPL_SCROLLER_GALLERY_1] inside the page editor area. This command instructs the system to merge in the gallery you have just placed on the page. The page editor should now look like the figure below.

6. Click **Save** button to save the page edits.

You have now successfully created a gallery and placed it on your web page. The figures below show the frontend display of a gallery on your web page. By clicking on the visible arrows on the far left or right of the scroller, you can scroll between the images in the gallery. By clicking on any image, you can go to the page of the website that the image is linked to.

Figure 1.4

Note: You can also have more than one gallery displayed in a web page. To display multiple galleries in your web page, simply repeat step 4 as above.
